IRRITATION IN RUSSIA IS SEEMINGLY ALLAYED

Newspapers Heartily Commend President Roosevelt's Neutrality Proclamation.

COMMENT OF THE PRESS

ST. PETERSBURG, March 14.-President Reosevelt's recent preclamation regarding the observance of neutrality by all officials and the abstention from either action or speech which might cause irritation to Japan or Russia, has caused a great impression here. The newspapers here print prominent articles commending the substance and spirit of the proclamation in the highest terms. The Official Gazette accepts it unre-

servedly as a complete answer to the charges that the American government is hostile to Russia, and declares that hereafter, despite any seemingly untoward incident which may arise, it will be considered once for all "that the American government has taken a friendly attitude towards our aims and policies in the far East." adding: "This undoubtedly marks a change in American sentiment, the people realizing the danger of supporting Japan." The Novisti halls the auspicious initiative of President Roosevelt in the interest of universal peace and good relationship between Russia and the United States, saying: "He wields practically unlimited au-Ohio-Fair on Tuesday, except snow along the lake. General Rennenkampf, who is to lead the Cossack division, is traveling on the same train. He tells me that all these reservists will become splendid, hardened soldiers a fortnight after reaching the front.

> "At Irkutsk we met the first victims of the war-women and children, trying to get back to European Russia. On our entrance into the semi-darkness of the station we were greeted by the wailing of children issuing from the dirt heaps and baggage encumbering the floor. Their waxen faces and bloodshot, sleepless eyes would melt a heart of stone. The wild, panic-stricken flight of their mothers from Manchuria after the startling outbreak of the war led to great sufferings. They reached this place after untold hardships, only to find that they will have to wait weeks more till there is sufficient train accommodation to enable them to proceed further. So the children have been pining, sleepless and motionless in this fetid atmosphere, because outside reigns deadly frost.'
